

203.14 - Vapor Pressure of Metals (rod and wire forms)

For further information see [SP 260-19](#)

PLEASE NOTE: The tables are presented to facilitate comparisons among a family of materials to help customers select the best SRM for their needs. For specific values and uncertainties, the certificate is the only official source.

SRM	Description	Unit of Issue	Pressure Range (Pa)	Temperature Range (K, ITS-90)
746	Cadmium-Vapor Pressure	6 cm rod	10^{-6} to 10^1	350 to 594
